

This comment is in regards to the radio station K-Love, which is a nonprofit listener supported radio station. K-Love located at 106.7 in the Burlington area is a great service to the local community and not only is it the ONLY station that is available for that type of music but I even care enough to support it financially when possible. The effect on the local community that supports K-Love would be detrimental if it were to be displaced by an LPFM broadcaster providing other programming.

The service that K-Love provides the community is very multifaceted, in that you can listen to it at work, with children, or anywhere else, without having to worry about the content that is played. This even includes the morning show and in today's day and age that is rare indeed. K-Love also gives inspiration music that uplift's low spirits and help some people even get through the very day that they have found themselves in. The top reason that the service provided by K-Love is so wonderful is that it truly brings people to God and specifically to Jesus Christ. It not only tries to outreach to new Christians, but also allows a constant vigil and prayer lines to help Christians that are currently going through hard times. It brings people closer to their faith and their Father - there is no value greater than that. Please accept this comment as being AGAINST the new broadcast service of LPFM, and particularly of switching K-Love to one of the LPFM stations. Thank you and you will always be Blessed in the Lord.
